

# QA Engineer

We are looking for a Quality Assurance (QA) engineer to develop and execute exploratory and automated tests to ensure product quality.

## Responsibilities

- Review requirements, specifications and technical design documents to provide timely and meaningful feedback
- Create detailed, comprehensive and well-structured **test plans** and **test cases**
- Estimate, **prioritize**, plan and coordinate testing activities
- Design, develop and execute automation scripts
- Identify, record, document thoroughly and **track bugs**
- Perform thorough **regression testing** when bugs are resolved
- **Track quality assurance metrics**, like **defect densities** and open **defect counts**
- Stay up-to-date with new testing tools and test strategies

## Requirements

- Proven work experience in software development
- Proven work experience in **software quality assurance**
- Strong knowledge of software QA methodologies, tools and processes
- Experience in writing clear, concise and comprehensive test plans and test cases
- Hands-on experience with automated testing tools
- Experience working in an **Agile/Scrum** development process
