

Front-end Developer

We are looking for a Front-End Web Developer who is motivated to combine the art of design with the art of programming. Responsibilities will include translation of the **UI/UX design** wireframes to actual code that will produce visual elements of the application. You will work with the UI/UX designer and bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

Responsibilities

- Develop new user-facing features
- Build reusable code and libraries for future use
- Ensure the technical feasibility of UI/UX designs
- Ensure user experience determines design choices
- Develop features to enhance the user experience
- Strike a balance between functional and aesthetic design
- Optimize application for maximum **speed** and **scalability**
- Collaborate with other team members and stakeholders

Requirements

- Proficiency in **HTML**, **CSS**, **JavaScript**, and jQuery.
- Understanding of server-side CSS pre-processing platforms, such as **LESS** and **SASS**
- Proficient understanding of **VueJS**
- Good understanding of **ReactJS** and **React Native**
- Good understanding of asynchronous request handling, partial page updates, and AJAX
- Proficient understanding of cross-browser compatibility issues and ways to work around them
- Proficient understanding of code versioning such as **Git**
- Experience with graphic design applications such as Adobe Illustrator
- Experience with **responsive and adaptive design**
