

# Back-end Developer

We are looking for an analytical, results-driven Back-end Developer who will work with team members to troubleshoot and improve current back-end applications and processes. The Back-end Developer will use his or her understanding of programming languages and tools to analyze current codes and industry developments, formulate more efficient processes, solve problems, and create a more seamless experience for users. You should have excellent communication, computer, and project management skills.

## Responsibilities

- Compile and analyze data, processes, and codes to **troubleshoot problems** and identify areas for improvement.
- Collaborating with the front-end developers and other team members to establish objectives and design more functional, cohesive codes to enhance the user experience.
- Developing ideas for new programs, products, or features by monitoring industry developments and trends.
- Recording data and reporting it to proper parties, such as clients or leadership.
- Participating in continuing education and training to remain current on best practices, learn new programming languages, and better assist other team members.
- **Taking lead on projects**, as needed.

## Requirements

- A degree in IT / Computer Science
- Fluency of **.NET core** with **C#**
- Solid experience in writing and querying **Json** documents and Graph DBs, especially **ArangoDB**
- Good understanding of **REST** and **GraphQL** APIs manipulation
- Strong understanding of the web development cycle and programming techniques and tools
- Focus on efficiency, user experience, and process improvement
- **Excellent project and time management skills**
- Strong problem solving and verbal and written communication skills
- Ability to work independently or with a group
